Arbistan site - Talal Mohamed Al Ahwazi

For example in Iran the country that is named by the Islam and considers themselves Om Al-Qura of the Islamic world, the government that our Arab nation lives is Al Ahwazi under their command by force, violates daily the simplest human rights including the detainees rights starting from arrest until the trial .

A proof of these violations spread, my watching from few days that i spent in the prison , through our Arab nation uprising Al Ahwazi in 15 April 2005 .

I watched by my eyes of the savage styles and the strange means that the system employs for the purpose of the eradication of the liberal and political movements in the centres and watched the prisons and the dark vaults where a short period was spent in them it was enough for my persuasion of an acceptance all what I heard from talks around the brutality of the Iranian security institutions and their distant secret intelligences all of the remoteness from the Islam and the leniency and the religious tolerance .

I carry out the arrest on when I was sleeping in my bed the last fifteenth of April night (2005) then they transferred me and I was blindfolded and bound hands, to a center what names by " corruptions social " in a region a " the security " in Al Ahwaz city
